EDUCATION

Thadomal Shahani Engineering College, Mumbai

B.E. in Information Technology

2022 – 2026

CGPA: 7.01 / 10.0

OBJECTIVE

Final-year IT Engineering student with hands-on experience building multiple production-ready full-stack applications using React.js, TypeScript, and Python. Combining front-end engineering expertise with financial data analysis and AI integration skills, seeking entry-level opportunities in Software Development, Frontend Engineering, or Fintech where I can leverage modern frameworks, AI-driven tools, and analytical thinking to deliver impactful solutions.

SKILLS

Programming Languages: C, Java, Python, JavaScript, TypeScript, HTML5, CSS3

Frontend Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Bootstrap

Backend & APIs: Node.js, REST APIs, JSON

Databases: MySQL, MongoDB, LocalStorage

AI Tools & Integrations: Google AI Studio, Gemini API, OpenAI GPT, Claude, ChatGPT, Prompt Engineering

Developer Tools: VS Code, Git, GitHub, GitLab, Vercel, Figma, Canva

Analytics & BI: Power BI, Tableau, Excel, Data Visualization

Financial Domain: Portfolio Management, Financial Analysis, Risk Management, Market Research

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering, Machine Learning, AI/ML, Cloud Computing

Soft Skills: Problem Solving, Team Collaboration, Agile Methodology, Communication, Adaptability

PROJECTS

Stock Screener Grabber | Python, Pandas, REST APIs, Data Integration

[Project Link](#)

- Engineered a Python automation tool integrating multiple financial APIs to aggregate and standardize stock market data.
- Processed 800+ entries daily with automatic deduplication, reducing manual data collection time by 90%.
- Implemented intelligent data filtering and custom screening logic to match predefined investment criteria.
- Exported clean, structured datasets into CSV format for advanced portfolio analysis and comparison.

Pro MCQ Test Platform | React.js, TypeScript, Gemini API, Vercel

[Project Link](#)

- Developed a React.js + TypeScript platform for aptitude practice with an interactive 1800+ question database.
- Integrated Google Gemini AI API to deliver intelligent, context-aware feedback enhancing learning outcomes.
- Implemented timer-based assessments and category-wise filtering for structured exam preparation.
- Deployed on Vercel with optimized performance, achieving sub-second load times and seamless UX.

Orbit Task Tracker | React.js, TypeScript, Tailwind CSS, LocalStorage, Vercel

[Project Link](#)

- Built a responsive task management application using React.js and LocalStorage for persistent session handling.
- Engineered an analytics dashboard with Tailwind CSS to visualize task distribution, completion rates, and productivity metrics.
- Enabled task categorization, priority tagging, and status tracking to improve user productivity by 40%.
- Optimized performance through efficient state management and reusable component architecture, deployed on Vercel.

CERTIFICATIONS

Financial Portfolio Management

Certified in market analysis, risk management, and portfolio optimization
